

Count of films according to category having a length greater than the minimum length in the dataset

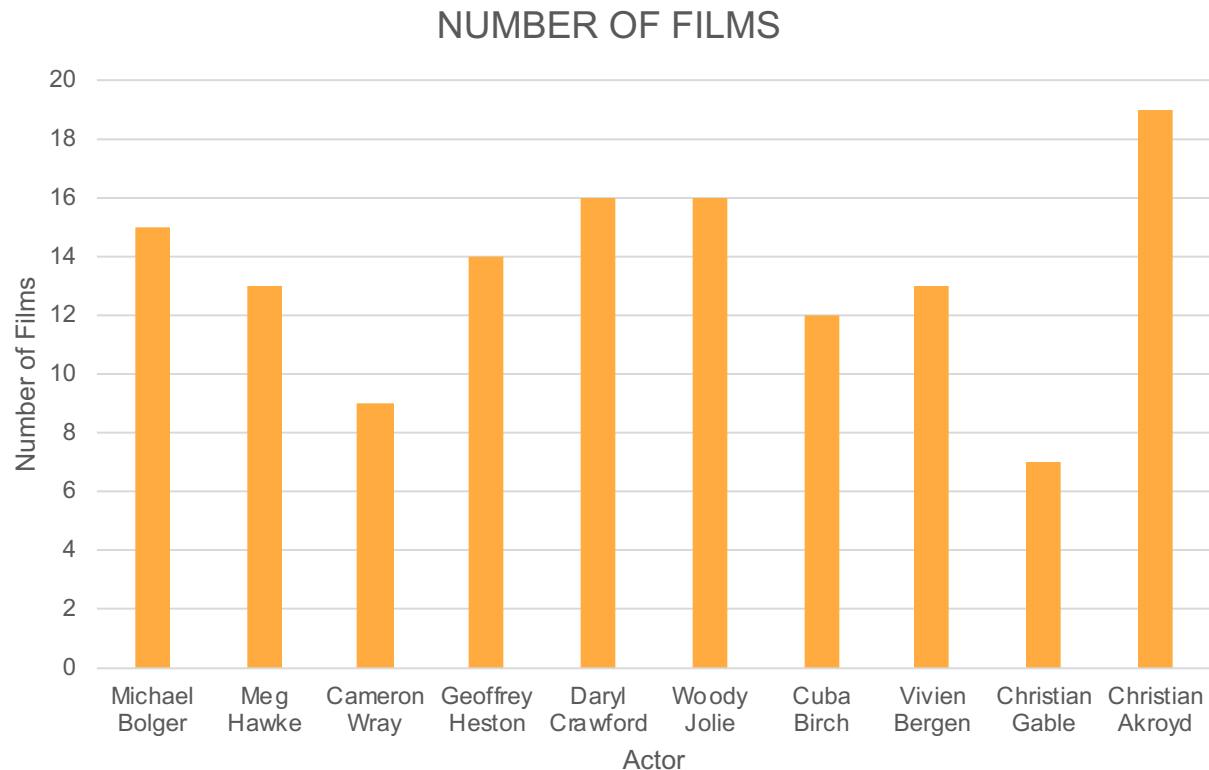

COUNT OF FILMS ACCORDING TO THE CATEGORY

We can see the number of films in each of the different categories whose length is greater than the minimum length.

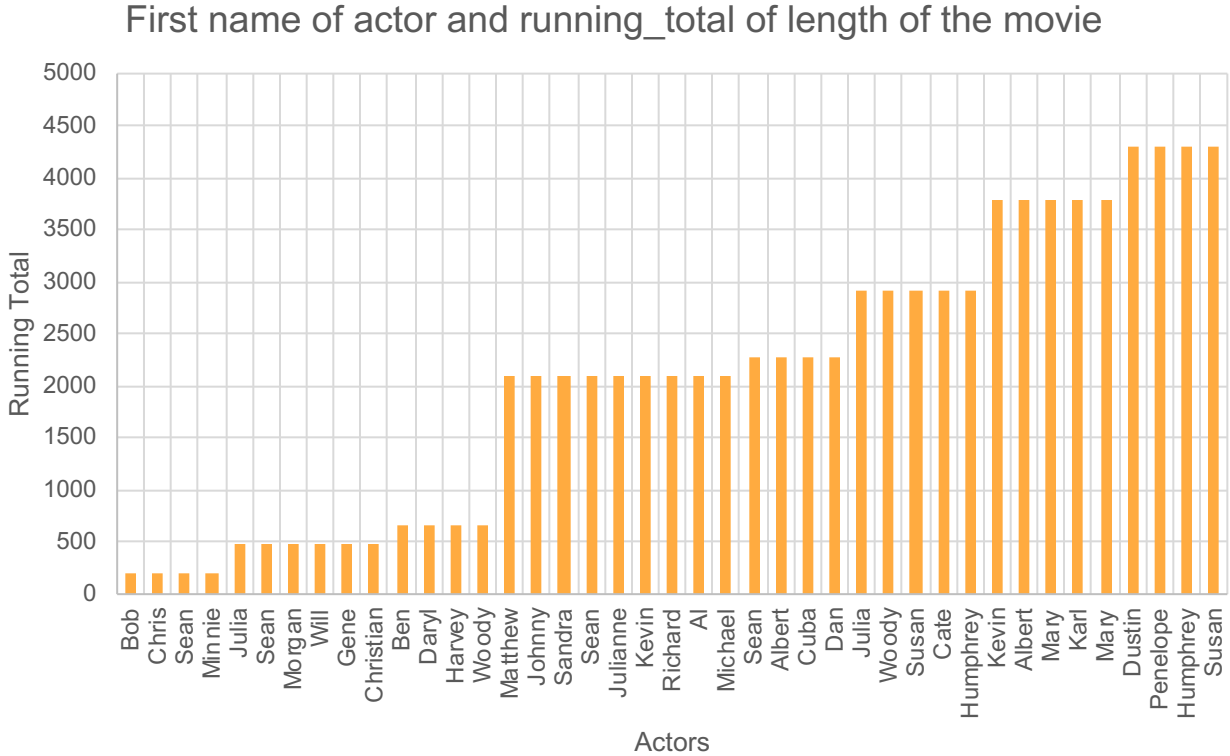

(The criteria of minimum length is chosen at random, and it happens to be 46 for this dataset.)

Count of the number of films done by each actor

We can see the actors, and the number of films done by each of them, whose length is greater than the movie named Alabama Devil.

Display of first name of actors and the sum of length considered as running total

We can see the first names of the actors and the sum of length of the movie which is here considered as running total and is less than 50 of movies whose title contains Goldfinger, Shining, Enough and Wonderful.

Display of the number of rentals for store 1 and store 2 in the year 2005 and 2006

We can see the number of rentals of store 1 and store 2 in the year 2005 and 2006
